

To whom it may concern,

I'm Jane from KEPA, which is a public organization affiliated with the Ministry of Environment of Korea.

KEPA is an organizer of the International Exhibition on Environmental Technology and Green Energy, so called ENVEX.

ENVEX is the most famous environmental exhibition in Korea since its first host in 1979 and the 42nd show is to be held July 8 to 10 in 2021.

ENVEX is expected to have approximately 250 companies and 40,000 visitors around the world including 1,000 of overseas buyers. It is well-known for its capability of making opportunities for exhibitors to find technical cooperation and to help explore market opportunities by providing one on one business meetings.

In addition, we provide for buyers with "Overseas Buyer Program," which includes 'One on One Business Matching' between exhibitors and buyers, 'Guided Hall Tour' during exhibition, and a chance of 'Site Visit', to some actual business sites in Korea which leading technologies and machineries of environmental area are placed.

Please find attached for detailed information.

Registration for exhibitors of ENVEX2021 has started November so please visit our website to find out details.

Thank you for your kind cooperation in advance and I look forward to establishing partnership with you at ENVEX2021.

Best Regards,

Jane
